## Tuftel HD2000

### Introduction to the HD2000

- The HD2000 is the third generation of the HD wall telephone series. Famous for their unique design that *extra firmly secures the handset to the base*, those telephones will operate perfectly in the most demanding conditions such as airports, railway stations, hospitals, museums, public locations, control rooms, equipment rooms, hotels, ships, submarines, security posts etc.
- The new improved design can feature 2 red leds located on each side of the base : they draw attention to incoming calls or inform when voice mail messages are waiting (PABX feature).
- Magnetic hook switch improves reliability and security.
- Keypad models can come with data port and receiver volume level adjustment.
- An optional desk mount kit provides a simple solution for other applications.
